POLYTOUCH®
Ticketing Solutions

The POLYTOUCH® FLEX series of ultra-compact kiosk terminals is the ideal solution for all venues where the efficient use of space is the main challenge because every square inch counts.

The small FLEX21.5 makes self-ticketing a big hit with your visitors. The almost frameless and super-flat touchscreen display in portrait format gives the kiosk the familiar look and feel of a tablet. The FLEX cuts a fine figure, whether in the stand-alone, wall-mounted, or countertop version. With the FLEX lite, we've taken minimalism to the extreme. It may not fit in a vest pocket, but it will fit in the tiniest foyer.

2020 WINNER
EUROPEAN PRODUCT DESIGN AWARD

Highlights - FLEX family

- · Ultra-compact terminals
- · Tablet-like look and feel
- · European Product Design Award 2020 (for FLEX21.5)
- · Coin and bill dispenser (optional for FLEX21.5)

PYRAMID

Standing in line is always annoying, most of all during leisure time. But POLYTOUCH® can help both your visitors and you!

Our kiosk terminals speed up ticketing wherever tickets are issued: in cinemas, museums, festival halls, amusement parks, zoological gardens, open air concerts, and more.

POLYTOUCH® kiosk systems eliminate the bottlenecks at your box office, enable speedy ticket sales, and ensure greater satisfaction for your visitors. All they have to do is select the desired event or performance, pay, and the terminal prints out the ticket.

With POLYTOUCH® technology, seat selection via seating plans can be integrated into the ticketing process just as cost-efficiently as selling vouchers.

Another advantage only available with a kiosk terminal: Show your visitors what you have to offer in terms of entertainment, art, and culture on the display, in pictures and videos. Or play marketing messages from your advertising partners during idle times to generate additional revenue.

If you want to set up, expand or modernize a self-service infrastructure for ticketing at your venue, POLYTOUCH® is your first choice! Take the decisive step towards a better customer experience, higher sales and lower costs with POLYTOUCH®.

At Pyramid Computer, we have many years of experience in ticketing. The largest U.S. movie theater chain has relied on POLYTOUCH® for nearly 10 years.

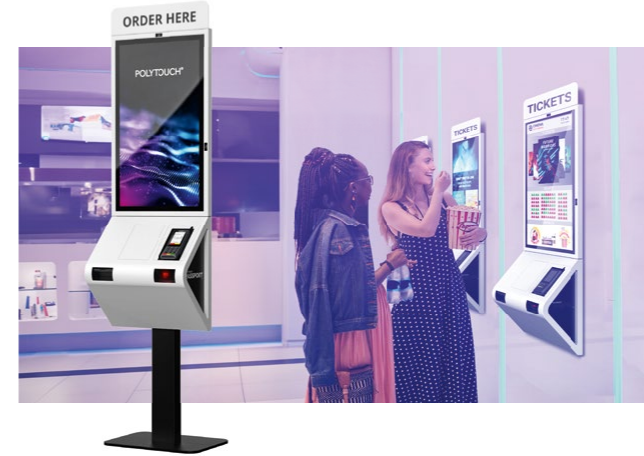

Market leaders have adopted the POLYTOUCH® CLASSIC. One of the terminal's many advantages is the modifiable design concept, which allows it to be easily configured for any specific use case. All peripheral modules (printer, scanner, payment module, etc.) are arranged around the 24" full-HD touchscreen display.

The CLASSIC´s computing power is scalable, so that you as the operator only pay for the performance your application actually requires.

If required, an LED-based user guidance guides visitors through the ticketing process. Self-service thus becomes child's play for young and old at any event.

Highlights - CLASSIC

· 24" Full HD touchscreen with anti-reflective coating
· Compact design
· LED based user guidance (optional)
· Quickmounting system for fast pheripheral change
· Multiple mounting options
· High modularity

With the slim POLYTOUCH® PASSPORT 32, ticketing becomes an aha experience for your visitors. This kiosk is the perfect combination of functionality and design, making it an eye-catcher at any event that makes self-service welcoming. The POLYTOUCH® PASSPORT´s multiple formats (single or dual display) and mounting options (wall-mount, pedestal) ensure maximum flexibility in throughput volume and placement.
Down the line, converting or retrofitting the POLYTOUCH® PASSPORT with peripheral modules, for which there is plenty of space in the console (belly), is completely straightforward.

Highlights - PASSPORT

· Slim design
· 32" Full-HD touchscreen display (single or dual display)
· Small footprint
· Very high modularity
· Multiple mounting options
· Tool-free installation

With its 150 kg (330 lbs), the POLYTOUCH® OUTDOOR is a weatherproof heavyweight for harsh and demanding operating conditions.
Selected hardware from a single source stands for high performance and ease of use in all seasons and predestines the terminal for continuous use in outdoor areas. The OUTDOOR´s full HD touchscreen comes from faytech®, the industrial PC from AKHET® and the kiosk technology from POLYTOUCH®. The large and clear 32" touchscreen makes it easy for all generations to purchase tickets. During idle times, the OUTDOOR provides visitors with important information about the events and the locations..

Highlights - OUTDOOR

· AKHET® IPC inside
· Intel® Core™ i5 CPU
· faytech® 32" Full HD touchscreen inside
· Brightness 1000 nt
· Surface Hardness 7H
· Simple serviceability
