

POLYTOUCH® CURVE 32

3 Product Areas - 1 Solutions World

The POLYTOUCH® CURVE is as adaptable as a chameleon. As an information terminal, it provides your customers with tailored information. It shows article availability, knows the ingredients, explains products and advertises sales promotions.

There is plenty of space for peripherals between the curved columns of the CURVE. This makes the terminal a cross-seller and upseller: as a virtual shelf, the CURVE expands your core range with attractive additional items and services such as gift cards (Amazon and so on) and tickets for regional events.

In this way, the CURVE retains regular customers, reaches new target groups and increases in-store frequency.

AKHET®

DEVELOPED FOR YOUR APPLICATIONS

High quality computer systems for Industrial Automation, Retail, Network & Security.

faytech

PROFESSIONAL TOUCH AND EMBEDDED SOLUTIONS

Design, development and manufacturing of touchscreen monitors and touchscreen computers.

Highlights - CURVE

- Innovative futuristic design
- Highly modular technology concept
- Plenty of space for peripherals (camera, dispenser...)
- 1 kiosk for many use cases
- High usability for customers

When it comes to the digitalization of retail, our POLYTOUCH® kiosk terminals are in the premier league. They make information and sales processes more efficient and redefine the customer shopping experience at all touchpoints.

More and more retailers are relying on self-service technologies to maximize sales and minimize costs. Kiosk terminals help to optimize processes and relieve employees. Precious staff resources can be deployed elsewhere to create more value.

Consumer acceptance of terminals is here, and with it the realization that digital solutions help to make shopping faster, more exciting, more informative and more convenient.

This flyer presents a selection of our POLYTOUCH® brand self-service technologies for retailers.

We offer our kiosk models in basic configurations that satisfy many application-specific use cases off the shelf. Add-on components (e.g., touch display) or peripheral modules (e.g., printer) at an additional cost are therefore generally not needed.

For special use cases, the terminal's platform principle enables both the cost-efficient implementation of your special requirements and a fast time-to-market. We can realize almost all your requirements for accessories, peripheral systems and mounting and fastening variants in the shortest possible time.

This makes POLYTOUCH® terminals your first choice for setting up a new or modernizing an existing self-service infrastructure.

With a POLYTOUCH® PASSPORT 32, you can use two kiosks in your store. This gives you twice the self-checkout capacity in one fell swoop. The slim design of the terminal takes up very little space, so it can easily be accommodated even in small stores. The PASSPORT 32 is a prime example of a kiosk system that can be easily converted and retrofitted with peripheral modules. There is plenty of space for them in the console and display frame. This means that the terminal can be cost-effectively adapted to specific use cases. For those who do not require dual power, the system is available as a single standalone and wall-mount version. Our birthday boy is trusted by a large pharmacy chain and EDEDA 24/7, among others.

Highlights - PASSPORT 32

- Slim design, small footprint
- In-house AKHET® PC box
- High modularity
- 2 kiosks in 1 system with dual display variant
- Tool-free installation and two-handed assembly
- Easy to maintain thanks to easy access to peripherals

You provide the visual content, the POLYTOUCH® NEO plays it out: razor-sharp and in brilliant colors.

On the NEO, further information about an item is always just a touch away for your customers: tips on how to wear the clothing, laundry instructions or complementary accessories.

A POLYTOUCH® NEO is not just functional! With its ultra-modern and ultra-flat touch panel (4 mm), it looks great in any store concept.

Highlights - NEO

- 21.5" full HD touch screen
- Flat and elegant design
- Panel profiles made of aluminum or real wood
- also for wayfinding and advertisement
- Optional ADA module

The compact chassis and numerous mounting options ensure that POLYTOUCH® FLEX21.5 can be installed anywhere - even where every square inch of space counts.

With its minimal frame, ultra-flat touchscreen, and portrait orientation, the FLEX looks and feels like a tablet. This creates a familiar usability for customers, making self-checkout inviting.

With the FLEX lite, we have taken minimalism to the extreme. It may not fit in a vest pocket, but it will fit in the smallest store

Highlights - FLEX21.5 + FLEX21.5 lite

- Compact (FLEX21.5), ultra-compact (FLEX21.5 lite)
- Tablet-like look and feel for ease of use
- European Product Design Award 2020 (FLEX 21.5)
- Coin and bill dispenser (optional for FLEX21.5)
